

The background of the image shows an industrial environment. In the foreground, there is a close-up view of a steel grating floor, consisting of a grid of metal bars. To the left, there is a yellow safety railing. In the background, more industrial structures, including a yellow crane or lift, are visible. The overall scene is brightly lit, suggesting an indoor industrial facility.

## **Steel Gratings**

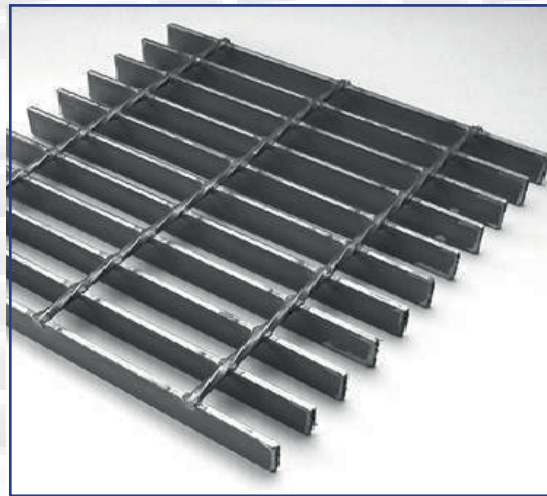

**Steel gratings are fabricated of carbon steel or stainless steel and main advantages are anti-slip surface, corrosion resistance, good drainage functionality and high load bearing capacity.**

**With such benefits steel gratings are ideal for use as walkways and stairs. Steel gratings are hot dip galvanized to EN 1461 standard for corrosion protection and also is offered as stainless steel material as per international standards upon request.**
